

## ES215A - Ozone generator

### Concept:

Rugged generator for low level applications where simplicity and reliability are required

### Technology:

Ozone is produced through a high voltage tubular generator with its integral power supply.

A pump supplies the feed gas of air.

### Main Application:

- ✓ Low-volume water treatment
- ✓ Personal healthcare
- ✓ Odour treatment
- ✓ Disinfection
- ✓ Laboratory Testing

Development Partner **Onnic International Ltd.**

### Typical Specification:

|               |                    |
|---------------|--------------------|
| Dimensions:   | L120 x W133 x H75  |
| Weight:       | 1.75Kg             |
| Ozone Output: | 0.2 gm/H           |
| Feed gas:     | Pumped Air         |
| Power:        | 20VA 230V 50/60 Hz |
| Connections:  | 5mm ID Tube        |
