

OZONE-DIRECT.COM
the premier source for ozone generation

Self-Test-01[®] – Trial Pack

Development partner – ONNIC International Ltd

Concept:

A LOW-COST STARTER PACK, Allowing customers' to assess the effects of ozone on their-own products, materials or processes, without the high-cost and limitations of outside laboratory assessments. **Available Off the Shelf**

Technology:

An entry-level system for safe generation and application of small quantities of ozone gas for basic tests to assess the effects of ozone on materials which may be rinsed with or immersed-in ozonated water or exposed to dry ozone gas....

Main Application:

The reactor has a removable lid and a conventional screw cap and draw-off tap, allowing production of dissolved ozone in water to be drawn-off for washing or rinsing samples of product. Materials can also be sealed inside the reactor – with or without water and Ozone applied to a range of concentrations, duration of application and total exposure..

Training & Support – Are provided by email, via FTP site – on-site training is available.

Above. The Self-Test-01 trial pack provides low-cost access to direct experience and early results in ozone...

Typical Specification:

Entry-Level Ozone Pack - Comprising

- 1 x Ozone generator....prodn.500mg/hr in air
- 1 x Reactor vessel.....30ltr nominal cap.
- 1 x Ozone destructor
- 1 x Ozone diffuser
- 1 x ozone delivery tube..
- 1 x dissolved ozone comparator + reagents

1 x Manual & lab. record book

Power Required – 40VA 230V 50/60 Hz
